

September 6, 1977

Mr. Carl Broman
Youngstown Sheet and Tube Company
3001 Dickey Road
East Chicago, Indiana 46312

Dear Mr. Broman:

Re: Disposal of Oily Waste from
6-Stand Oil Recovery Unit

You are hereby granted approval to dispose of oily waste from the 6-Stand Oil Recovery Unit at the Gary Land Development Landfill, #45-2. This waste was previously approved on a temporary basis by a letter dated March 4, 1977.

The staff uses a 10 to 1 liquid ratio, that is 10 gallons of liquid waste to one compacted cubic yard of refuse, in determining a landfill's capacity for absorbing approvable liquid waste. After reviewing the amount of liquid waste and general refuse being disposed of at the Gary Land Development site, it has been determined that the site is capable of absorbing the oily waste from the 6-Stand Oil Recovery Unit.

It is understood that there is approximately 1,200 gallons per day of this waste generated for disposal. This waste should be mixed with the general refuse and covered at the end of the working day. Any necessary local approval must be obtained from the Gary City Health Department.

If you have any questions, please contact Mr. Bruce Palin or Mr. Guinn Doyle of the Solid Waste Management Section at AC 317/633-0176.

Very truly yours,

Oral H. Hert
Technical Secretary
